**SIX DEGREES OF
EDUCATION**
AN EDUCATIONAL OUTREACH INITIATIVE

We want to educate the public about Pitbulls, and we need your help! So we are asking that you pledge to share five important facts about Pitbulls with six people. These people can be friends, strangers, family, co-workers and anyone else who will listen! You may in turn ask them to share the information with people they know. Word of mouth is one of the most effective ways to share information. Remember, it all starts with YOU!

ONE Pitbulls don't have locking jaws, three rows of teeth, swelling brains, or special enzymes that cause them to "snap" like Jekyll and Hyde. There is not an ounce of truth in any of these myths. Experts rate Pitbulls right along side Golden Retrievers and English Springer Spaniels when it comes to behavior and stability.

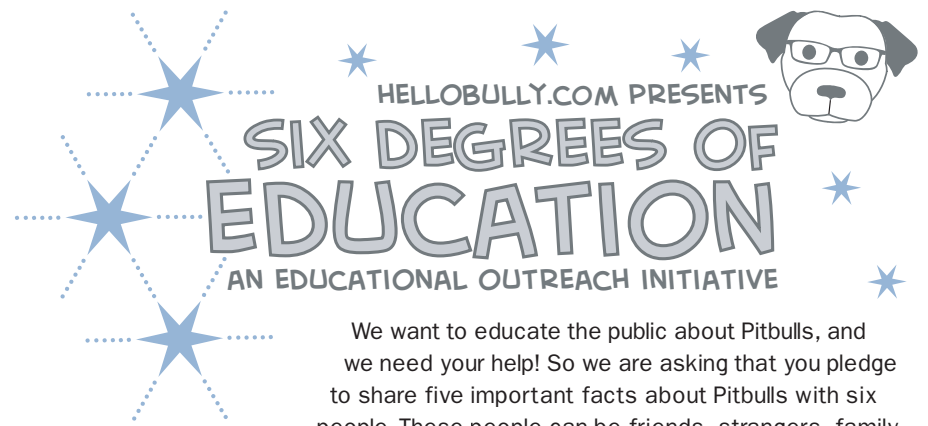

TWO Pitbulls love people. They were bred to be very people friendly. Even dogs bred for fighting in the pits of Staffordshire in the early 1900's needed to be easily handled by people. Therefore, it is not true that if a Pitbull attacks another animal, it's just a matter of time before he will attack a person.

THREE Adult Pitbulls from shelters can be highly adoptable family pets. Always do breed research, visit a reputable shelter, ask questions and spend time with the dog before making your decision. We admit, there are few things cuter than a Pitbull puppy, but if you adopt an adult Pitbull, what you see is what you get.

FOUR Spay and neuter! There are hundreds of thousands of unwanted Pitbulls being euthanized in shelters each year. Many behavioral and medical issues can be resolved or avoided through spaying and neutering. Recent statistics show that only 1 in 600 Pitbulls will find a home. Pitbulls need us to JUST SAY NO TO BREEDING!

FIVE There is no proof that banning Pitbulls makes communities safer. Breed bans and Breed Specific Legislation give people a false sense of security. What DOES work are "Dangerous Dog" laws that hold irresponsible owners accountable for the actions of their dogs.
